Thesis Title

by

Masoud Gholami Estahbanati

A thesis submitted in partial fulfillment for the
degree of Master of Informatics

in the
Department of Informatics

Prof. Sven Hartmann

March 2016

CLAUSTHAL UNIVERSITY OF TECHNOLOGY

Abstract

Department of Informatics

Master of Informatics

by Masoud Gholami Estahbanati

The Thesis Abstract is written here (and usually kept to just this page). The page is kept centered vertically so can expand into the blank space above the title too...

Acknowledgements

The acknowledgements and the people to thank go here, don't forget to include your project advisor...

Chapter 1

Introduction

Here we have the Introduction and an overview on the domain, problem and solution

1.1 Motivation

Here will talked about the domain we are working on, the motivations, scope of the domain

1.2 Problem

Here we will introduce the problem we are trying to solve and describe why is it a problem

1.3 Solution

Here we will have an overview on the solution we have found

1.4 Results

We talk about the results we have given from the solution, did we solve the problem or not

Chapter 2

Background Theory

Here we have a description of the needed background to solve the issue and to understand the work that has been done

Chapter 3

Current Status

Here we have an explanation of the current status of the researchs done by others and the other solutions that are suggested for this problem (if there are any)

Chapter 4

Experimental Setup

We explain our solution in details with the methods that are used here.

4.1 Concept

The introduction of the methods that are used in the solution

4.2 Approach

Description of the approach in details along with the methods that are being used

4.3 Results

Test results will be written here along with the performance and other metrics

Chapter 5

Conclusion

Here we will discuss the solution and check if the expectations are met and if the problem is solved (how good is it solved).

Appendix A

An Appendix

An appendix if eventually needed
